Airmax Underground
Piercing Tools

Run pipe and conduit under sidewalks, driveways and streets without cutting or patching

Air Pro Underground Piercing tools are the fastest and easiest way to install utilities under roads, sidewalks and driveways without disturbing the surface above or stopping traffic. These easy to handle, yet powerful tools can penetrate the toughest soils to install cable, pipe or conduit. Tool design is kept simple and rugged for long and dependable performance life. We back them up with over twenty years of experience.

HP1025	10-1/4	260	90	2300	1450	650	2	350	10,0

How it works:

1. *Simply dig a trench at either side of the street.*
2. *Feed the tool from one trench to the other.*
3. *The piercing tool creates a hole for your pipe or conduit.*
4. *Pull your pipe or conduit back under the street using the air hose.*
